END USER LICENSE AGREEMENT (EULA)

Software: Individual Take Sync Group

Publisher / Licensor: Emelowsky
Date / Version: 2026
Language: English (EN)

IMPORTANT — READ CAREFULLY: This End User License Agreement is a legally binding agreement between the Licensee and the Licensor (Emelowsky). Downloading, installing, activating, or using the Software constitutes full acceptance of the terms and conditions set forth below.

§ 1. GENERAL PROVISIONS AND DEFINITIONS

1. This End User License Agreement (hereinafter referred to as the “Agreement” or “EULA”) is a legally binding agreement between the Licensee (an individual or legal entity acquiring the license) and the Licensor (Emelowsky).
2. The subject of this Agreement is the Lua software/script for the Cockos REAPER DAW environment entitled Individual Take Sync Group (hereinafter referred to as the “Software”), including associated script files, licensing modules, and documentation.
3. Downloading, installing, activating, or using the Software constitutes full acceptance of the terms and conditions of this Agreement.
4. The Software is distributed as one set of files that works in two modes:
   - **DEMO Mode** — free of charge, without activation, as described in § 2(4).
   - **Full Version** — after license activation pursuant to § 2 and § 4, in the same set of files.

§ 2. GRANT OF LICENSE AND CONDITIONS OF USE

1. The Licensor grants the Licensee a personal, non-exclusive, worldwide license to use the Software under the following terms:
   - **Named License (Personal / Commercial Use):** The license is assigned to a specific Licensee (email address provided upon purchase) and bound to a unique hardware identifier (“Machine ID”).
   - **Workstation Allowance:** The license is bound to ONE specific computer, identified by the Software’s hardware fingerprint (Machine ID). At any given time, the Software may be activated and used on only one computer — the one for which the license was issued.

2. The Licensee may transfer their license to another computer they own (e.g. after replacing hardware or when the Machine ID changes). To do so, the Licensee must: (a) deactivate the license on the current computer via the Software's options panel, and (b) in the Licensor's customer panel, transfer the license and obtain a new license key bound to the new computer's hardware identifier ("Machine ID"). Self-service transfers are available a limited number of times (currently 5); once the limit is reached, the Licensee must contact the Licensor to have it renewed. A license transferred to a new computer is revoked on the previous computer. For security reasons, each license key is cryptographically bound to one specific Machine ID and cannot be reused on a different device without a newly issued key.

3. The license includes the right to use the Software for personal, educational, and commercial purposes (including professional recording studios, music production, mixing, and mastering workflows).

4. Without an active license, the Software runs free of charge in DEMO Mode, which requires no activation and is functionally limited to a maximum of two (2) simultaneously synchronized groups within a single REAPER project, with a maximum of six (6) tracks or items in each group. DEMO Mode does not delete the Licensee's data — groups and members over the limit remain in the project and are synchronized again after license activation. The Software also switches to DEMO Mode after the license is deactivated or revoked (§ 4(5)). The provisions of § 3, § 5 and § 6 of this Agreement apply to DEMO Mode accordingly.

§ 3. RESTRICTIONS AND COPYRIGHT

1. The Software is protected by copyright laws and international intellectual property treaties. All intellectual property rights, copyrights, source code, operating logic, and algorithms remain exclusively with the Author (Emelowsky).

2. The Licensee IS EXPRESSLY PROHIBITED FROM:
   - Copying, distributing, reselling, sublicensing, renting, leasing, or sharing the Software or license keys with any third party without written consent from the Licensor.
   - Decompiling, disassembling, reverse engineering, removing security or licensing mechanisms, or attempting to bypass or circumvent the Software's license verification.
   - Publicly sharing license keys, activation files, Machine IDs, or order details on the internet or public domains.
   - Removing, altering, or obscuring any copyright notices or trademarks embedded in the Software or documentation.

§ 4. ACTIVATION, ONLINE VALIDATION, AND OFFLINE MODE

1. **Hybrid Activation:** Activation of the Software relies on a cryptographic license key bound to the Licensee's computer Machine ID and purchase email address.

2. **Offline Usage & Fail-Open Behavior:** The Software does NOT require a continuous internet connection and maintains full functionality of the Full Version during offline use without any time limitation. The absence of an internet connection will NEVER cause automatic software lockouts or feature disablement.

3. **Online Validation:** At activation and periodically afterwards, strictly when an active internet connection is available, the Software connects to the Licensor's validation server over an encrypted HTTPS connection to check whether the license has been revoked.

4. **Transmitted Data:** During online validation, only the following data is transmitted: a hash of the license key and the hardware identifier (Machine ID — itself a cryptographic hash that cannot be used to recover hardware data). Like any web server, the Licensor's server automatically logs the technical IP address of the connection. This data is used solely to check whether the license has been revoked, and is never used for user activity tracking, sold or shared with third parties.

5. **License Revocation:** The Licensor reserves the right to revoke or disable a license key via the validation server in the event of fraudulent purchases, payment chargebacks, unauthorized key leakage into the public domain, or material breach of this Agreement. After a key is revoked by the server, the Software switches to DEMO Mode (§ 2(4)) and informs the Licensee.

§ 5. DISCLAIMER OF WARRANTY AND LIMITATION OF LIABILITY

1. The Software is provided "AS IS", without warranty of any kind, express or implied.

2. The Licensor does not warrant that the operation of the Software will be completely error-free, uninterrupted, or fully compatible with future versions of Cockos REAPER, third-party plugins, or operating systems.

3. **Limitation of Liability:** To the maximum extent permitted by applicable law, the Licensor (Emelowsky) shall not be liable for any direct, indirect, incidental, special, or consequential damages (including, without limitation, loss of data, corrupted audio projects, business interruption, loss of profits, or hardware damage) arising out of the use or inability to use the Software.

§ 6. FINAL PROVISIONS

1. This Agreement becomes effective upon downloading, installing, launching, or activating the Software and remains in effect until terminated.

2. The Agreement shall terminate automatically and immediately if the Licensee fails to comply with any of its terms. Upon termination, the Licensee must cease all use and delete all copies of the Software in their possession.

3. For matters not regulated by this Agreement, the laws of Poland shall apply, particularly the Act on Copyright and Related Rights and the Civil Code.
