EMELOWSKY • REAPER SCRIPTS

END USER LICENSE AGREEMENT (EULA)

Software: Plugin Shelf for REAPER (and associated Lua scripts / actions)

Publisher / Licensor: Emelowsky
Software Version: 3.2 and newer
Last Updated: October 2026
Language: English (EN)

IMPORTANT — READ CAREFULLY: This End User License Agreement is a legally binding agreement between the Licensee and the Licensor (Emelowsky). Downloading, installing, copying, or using the Plugin Shelf for REAPER script ("Software") constitutes full acceptance of the terms and conditions set forth below.

§ 1. GRANT OF LICENSE

1. The Licensor grants the Licensee a personal, non-exclusive, non-transferable, limited license to use the Software under the following conditions:
   - **Named License (Personal / Commercial):** The license is assigned to a specific Licensee (purchase email address) and bound to ONE unique hardware identifier (“Machine ID”). At any given time, the Software may be activated and used on only one computer — the one for which the license was issued.
   - **Activation:** After the purchase, the Licensee logs into the Licensor’s customer panel (with the purchase email address and the license key received from the store), enters the computer’s Machine ID shown in the Software and receives a product key, which they paste on the Software’s activation screen.
   - **License Transfer:** The license is NOT transferable to third parties (it may not be resold, assigned, or shared with another person or entity). The Licensee may move the license to a different computer they own (e.g. after replacing hardware or when the Machine ID changes): to do so, the Licensee deactivates the license in the Software (Options → License) and, in the Licensor’s customer panel, frees the seat of the previous computer and issues a new license key bound to the new computer’s Machine ID. The number of such operations in the customer panel within a given period is limited; the limit renews automatically. The license key of a computer whose seat has been freed is revoked. Issuing a key again for a computer whose seat was previously freed may require contacting the Licensor. For security reasons, each license key is cryptographically bound to one specific Machine ID and cannot be reused on a different device without a newly issued key.
   - **Perpetual License:** The license is granted for an unlimited period of time (perpetually) for a one-time fee — with no subscription and no recurring fees.
   - **Additional Seats:** To use the Software on more than one of their own computers at the same time, the Licensee may purchase, under the same email address, up to two additional licenses at a reduced price, according to the Licensor’s current price list — up to three computers at the same time in total. Each license (seat) is bound to one Machine ID. A larger number of seats is available upon contacting the Licensor.
   - **Commercial Use:** Commercial use is permitted (including professional recording studios, music production, mixing, and mastering workflows).

§ 2. LICENSE VERIFICATION, ONLINE VALIDATION & KEY PROTECTION

1. **Periodic Online Validation:** Starting from version 3.2, the Software incorporates periodic online license validation. The Software periodically, strictly when an active Internet connection is available, connects to the Licensor’s authentication server to verify license validity and activation status.
2. **Transmitted Data:** During activation and periodic online checks, only essential technical parameters are transmitted over an encrypted HTTPS connection: a hash of the license key and a hashed hardware identifier (Machine ID, irreversibly hashed via cryptographic algorithm — cannot be used to recreate original system information). The Licensor’s server automatically logs standard technical IP addresses, as with all internet web requests. Transmitted data is never used for user activity tracking or sold to third parties.

3. **Customer Panel:** In the customer panel the Licensee provides the purchase email address, the license key received from the store and the Machine ID. This data is stored and used solely to issue, transfer and revoke license keys and to contact the Licensee about their license. Payments are processed by the store (payment intermediary) — the Licensor neither receives nor stores payment card data.

4. **Offline Usage & Fail-Open Behavior:** The Software does not require a continuous Internet connection and maintains full operation of the Full Version during offline use without any time limitation. Periodic online validation occurs strictly when Internet access is available. Absence of an Internet connection will never cause automatic lockouts or feature disablement. Restriction of Software access occurs solely upon explicit server confirmation of license revocation (see point 5 below).

5. **License Revocation:** The Licensor reserves the right to revoke or disable a license key via the validation server in the event of fraudulent purchases, payment chargebacks, store refunds, unauthorized key leakage, or breach of this Agreement. Explicit server revocation results in immediate disabling of the Full Version.

§ 3. INTELLECTUAL PROPERTY & RESTRICTIONS

1. The Software is protected by copyright laws and international intellectual property treaties. All rights not expressly granted herein are reserved by the Author (Emelowsky).

2. The Licensee IS EXPRESSLY PROHIBITED FROM:
   - Decompiling, reverse engineering, disassembling, or modifying the source code (including Lua scripts and associated libraries) to strip protection or create derivative commercial products.
   - Selling, sublicensing, renting, leasing, distributing, or transferring the Software or license keys to any third party.
   - Publicly sharing license keys, Machine IDs, or generated key files.
   - Redistributing modified versions of the script under one’s own name or branding.

§ 4. DEMONSTRATION VERSION (DEMO)

1. If the Software is running in DEMO mode:
   - The license is granted strictly for evaluation purposes with limited functionality (e.g., restricted category counts, plugin limits, and locked settings).
   - The DEMO version may not be altered or redistributed outside official channels.

§ 5. TECHNICAL REQUIREMENTS & THIRD-PARTY SOFTWARE

1. The Software functions as an extension script for Cockos REAPER DAW and relies on third-party extensions/bindings (such as ReaImGui or SWS Extension). The Author is not responsible for software incompatibility caused by third-party updates, missing dependencies, or host DAW changes.

§ 6. DISCLAIMER OF WARRANTY AND LIMITATION OF LIABILITY

1. The Software is provided “AS IS”, without warranty of any kind, express or implied.
2. The Licensor does not warrant that the operation of the Software will be completely error-free, uninterrupted, or fully compatible with future versions of Cockos REAPER, third-party extensions, or operating systems.
3. **Limitation of Liability:** To the maximum extent permitted by applicable law, the Licensor shall not be liable for any direct, indirect, incidental, special, or consequential damages (including, without limitation, loss of projects, loss of data, business interruption, or financial loss) arising out of the use or inability to use the Software.

§ 7. TERMINATION

1. This Agreement terminates automatically if the Licensee fails to comply with any of its terms. Upon termination, the Licensee must cease all use of the Software and delete all copies in their possession.

§ 8. GOVERNING LAW

1. This Agreement shall be governed by and construed in accordance with the laws of Poland, without regard to its conflict of law principles.
