END USER LICENSE AGREEMENT (EULA)

Software: Track Drop for REAPER

Publisher / Licensor: Emelowsky
Date / Version: 2026
Language: English (EN)

IMPORTANT — READ CAREFULLY: This End User License Agreement is a legally binding agreement between the Licensee (an individual or entity acquiring the license) and the Licensor (Emelowsky). Downloading, installing, activating, or using the Software constitutes full acceptance of the terms and conditions set forth below.

§ 1. GENERAL PROVISIONS AND DEFINITIONS

1. This End User License Agreement (hereinafter referred to as the “Agreement” or “EULA”) is a legally binding agreement between the Licensee (an individual or entity acquiring the license) and the Licensor (Emelowsky).
2. The subject of this Agreement is the Lua software/script for the REAPER DAW environment entitled Track Drop for REAPER (hereinafter referred to as the “Software”), supplied as one script file “Emelowsky - Track Drop for REAPER.lua” together with its documentation.
3. Downloading, installing, activating, or using the Software constitutes full acceptance of the terms and conditions of this Agreement.
4. The Software is distributed as one file that works in two modes:
   - **DEMO Mode** — free of charge, without activation, as described in § 2(4).
   - **Full Version** — after license activation pursuant to § 2 and § 4, in the same file.

§ 2. GRANT OF LICENSE

1. The Licensor grants the Licensee a non-exclusive, worldwide license to use the Software under the following conditions:
   - **Named License (Personal / Commercial), single workstation:** Assigned to a single Licensee and bound to ONE specific computer, identified by the Software’s hardware fingerprint (“Machine ID”), generated automatically and shown in the Software's license window. At any given time, only ONE computer may hold an active license for a given key.

2. The license is NOT transferable to third parties (it may not be resold, assigned, or shared with another person or entity). The Licensee MAY, however, move their own active copy of the Software to a different computer they own. To do so, the Licensee must: (a) deactivate the license on the current computer using the “Deactivate license” function in the Software (Options → License), and (b) in the Licensor’s customer panel, transfer the license and obtain a new license key bound to the new computer’s Machine ID. Self-service transfers are available a limited number of times (currently 5); once the limit is reached, the Licensee must contact the Licensor to have it renewed. A license transferred to a new computer is revoked on the previous computer. For security reasons, each license key is cryptographically bound to one specific Machine ID and cannot be reused on a different device without a newly issued key.

3. The license includes the right to use the Software for personal, educational, and commercial purposes (including commercial audio production and mixing).

4. Without an active license, the Software runs free of charge in DEMO Mode, which requires no activation and is functionally limited to moving a maximum of three (3) tracks in a single move operation; any additional selected tracks are skipped and stay where they are. DEMO Mode does not delete or modify the Licensee's data beyond the moves the Licensee performs. The Software also switches to DEMO Mode after the license is deactivated or revoked (§ 4(4)). The provisions of § 3, § 5 and § 6 of this Agreement apply to DEMO Mode accordingly.

§ 3. RESTRICTIONS AND COPYRIGHT

1. The Software is protected by copyright laws and international intellectual property treaties. All intellectual property rights and copyrights to the Software remain exclusively with Emelowsky.

2. The Licensee IS EXPRESSLY PROHIBITED FROM:
   - Copying, distributing, reselling, sublicensing, renting, or leasing the Software to any third party without written consent from the Licensor.
   - Reverse engineering, decompiling, disassembling, or modifying the source code to bypass protection or license verification mechanisms.
   - Sharing license keys, license files, the Licensee’s Machine ID, or other activation data with third parties.

§ 4. ACTIVATION AND ONLINE / OFFLINE LICENSING

1. Activation of the Software does not require a permanent internet connection: the license key is cryptographically bound to the Licensee’s computer Machine ID and email address and is verified locally on the Licensee’s computer.

2. The Licensee agrees to provide accurate and truthful information (including a genuine email address) during the Software activation process.

3. At activation and periodically afterwards, strictly when an Internet connection is available, the Software checks with the Licensor’s server whether the license has been revoked. Only the following data is transmitted: a hash of the license key and the hardware identifier (Machine ID — itself a cryptographic hash that cannot be used to recover hardware data), over an encrypted connection (HTTPS). Like any web server, the Licensor’s server automatically logs the technical IP address of the connection. The transmitted data is not used to track user activity and is not sold to third parties. The absence of an Internet connection or of a connection to the Licensor’s server will NEVER lock the Software or deactivate the license — the Software keeps working normally, without any time limitation.
4. The Licensor reserves the right to revoke a license key if a breach of this Agreement is detected, if a key is leaked into the public domain, if the purchase or payment is refunded (including a chargeback), or if the license was paid for with a stolen card. After a key is revoked, the Software switches to DEMO Mode (§ 2(4)) and informs the Licensee.

§ 5. DISCLAIMER OF WARRANTY AND LIMITATION OF LIABILITY

1. The Software is provided “AS IS”, without warranty of any kind, express or implied.
2. The Licensor does not warrant that the operation of the Software will be completely error-free, uninterrupted, or fully compatible with future versions of the REAPER environment or operating systems.
3. **Limitation of Liability:** To the maximum extent permitted by applicable law, the Licensor shall not be liable for any direct, indirect, incidental, or consequential damages (including, without limitation, loss of data, corrupted audio projects, business interruption, or loss of profits) arising out of the use or inability to use the Software.

§ 6. FINAL PROVISIONS

1. This Agreement becomes effective upon downloading, installing, or activating the Software.
2. For matters not regulated by this Agreement, the laws applicable to the location/place of business of the Licensor shall apply.
